

Ant Hotspots

BATHROOM:

Excess moisture attracts ants (especially carpenter ants).

BEDROOM:

Food left behind will attract ants, as well as open and/or damaged window screens.

POTTED PLANTS:

This is probably a sign of another pest problem. Ants often seek out other plant-harming insects.

KITCHEN:

Ants come looking for any food or liquid left behind.

BASEMENT:

Pavement ants like to nest in cracks and underneath concrete slabs. Damp basement conditions can also bring ants in.
